

Homework

Homework

- For this homework, you will continue from the previous session's homework.
- Before you begin working, download the End Day 2 Exercise from today's session in the lesson portal on GAP and view the finish example.
- Launch VS Code. Make sure **auto save** is on.
- Navigate to the **homework-module1** folder via *Open folder*.

Reminder:

Make at least 2 commits and push to your remote Github repository during and also at end of coding.

Homework

- For this homework, you will do something similar to the demo we'd just finished.
- Open [index.html](#). You will start with this page.
- The area of the page that you will convert from HTML to JavaScript is partners. This section contain six images:

- At the end of this homework, things should remain the same on the front end. There should be no changes to how they look.

Homework

- First, **deactivate** the partners list codes on the [index.html](#) page:

```
<section>
  <ul id="partners">
    <!--<li class="partner">
      
    </li>
    <li class="partner">
      
    </li>
    <li class="partner">
      
    </li>
    <li class="partner">
      
    </li>
    <li class="partner">
      
    </li>
    <li class="partner">
      
    </li>-->
  </ul>
</section>
```

Homework

- Before you begin this code conversion, check the page on the browser to make sure the partner images is no longer displayed.
- If so, you may begin writing your scripts.
- Some things to take note:
 - This code conversion should also be applied to the other pages, ie. [activities.html](#) and [contact.html](#).
 - You do not need to change or add any CSS codes. The styling has already been done in your previous CSS exercise and will be used the same way.

Homework

- **Due Date:**
 - This Friday 10.30PM PT.
- **Submission**
 - Post Github URL link on GAP Week 3 Day 2 Homework dropbox.
